Mr. Johnny Martinez, City Manager
City of Miami
444 S.W. 2nd Ave.
Miami, FL 33130-1910

Subject: Proposed Roadway Transfers to City of Miami

Dear Mr. Martinez:

The Department has recently completed a countywide analysis of potential roadway transfers and has identified corridors for possible transfer as identified in the attached map and table. As you will see, we are proposing transfer of several City of Miami (City) roads to the State, as well as one State road to the City. The proposed roadway transfers should prove to be beneficial for the City and the State. Upon completion of a transfer, the respective jurisdiction would have control over planning, access management, permitting, landscaping, maintenance, traffic control, bicycle and pedestrian improvements, and various other roadway improvements.

The proposed list involves the transfer of roadways to and from the City of Miami to the State. We are requesting a point of contact to be the lead representative of the City in coordinating this process. We will also set up a kick-off meeting for all affected offices in order to initiate the coordination effort.

The roadway transfer process is briefly outlined as follows. In accordance with statute, the terms of roadway transfers must be mutually agreed upon between the Department and the City (Section 335.0415, Florida Statutes). The Department will work with your representative in the preparation and conditions of the roadway transfer agreement. Once the agreement is completed, the Department will require a Resolution from the City authorizing the execution of the transfer agreement, including a statement that the City agrees with the terms and conditions contained in the agreement. The Resolution will be attached to the final transfer agreement. Once executed, all originals should be returned to the Department, together with two (2) originals or certified copies of the original Resolution authorizing the City designated representative to execute the Transfer

Agreement. Once executed by the Department, an original will be returned to the City for its records.

We look forward to working with the City of Miami in a mutually beneficial relationship to effect these transfers. The Department will coordinate as necessary to obtain additional information that may be required during this process. Thank you for your consideration of this effort. A map depicting the alignment of the proposed roadway transfers to the City is attached.

If you should have any questions, or need additional information regarding the proposed roadway transfers, please contact Phil Steinmiller, Planning Manager at (305) 470-5386 or via email at phil.steinmiller@dot.state.fl.us. Thank you for your attention and assistance in this matter.

Sincerely,

Gus Pego, PE
District Six Secretary
